Vizianagaram, Andhra Pradesh |

## CAREER OBJECTIVE

---

Motivated B. Tech Computer Science student specializing in AI and Machine Learning, aspiring to build a successful career as a Software Engineer. Seeking opportunities to apply my programming, problem solving, and software development skills in real-world projects. Passionate about learning emerging technologies, developing innovative solutions, and continuously improving my technical expertise. Eager to contribute to a dynamic organization while growing as a skilled and responsible technology professional.

## EDUCATION:

---

**BTech (CSE – AI & ML)**, Lendi Institute of engineering and technology, Vizianagaram | **CGPA: 9.0** (2028)

**Intermediate**, Narayana Junior College, Vishakhapatnam | 93.1 % (2024)

**10th**, Gurajada Public School, Vizianagaram. | 93.16% (2022)

## TECHNICAL SKILLS:

---

**Programming Languages:** C, Java, Python

**Databases:** MySQL, MongoDB

**Tools & Performs:** VS Code, Google Collab

**Core Computer Science:** DSA,OOPS,DBMS,OS

## INTERNSHIPS:

---

### AICTE Virtual Intern — Edu Skills

Generative AI, Deep Learning & Language Models Virtual Internship

- During this internship, I strengthened my understanding of Generative AI, Deep Learning, LLMs, AI concepts and practical applications.

Google AI-ML Virtual Internship

- This internship provided valuable exposure to: AI&ML fundamentals, Data preprocessing and model development. Real-world AI applications.

## CERTIFICATIONS:

---

Critical Thinking in the AI Era – HP Life

Basics of Python – Infosys Springboard

Introduction to Modern AI – Cisco Networking Academy

## PERSONAL TRAITS:

Good communication and teamwork skills

Strong willingness to learn and adapt

Responsible and detail-oriented approach

## **PROJECTS:**

---

### **Sensor Based Bike Safety Detection System (Design Thinking Innovation – Academic Project)**

- The Sensor-Based Bike Safety Detection System was designed to enhance rider safety by detecting nearby objects.
- Providing timely alerts and vibration at the handle of the vehicle when an object is detected. Automatic vehicle slowdown using rpm motor.
- Designed and simulated the prototype using Arduino Uno, an Ultrasonic Sensor, Buzzer and Tinkercad to demonstrate the working concept

## **DECLARATION:**

---

I hereby affirm that the above information in this document is accurate and true to the best of my knowledge.
